

deltasec

LITTER CONDITIONER

- ✓ **HIGH ABSORPTION CAPACITY**
Absorbs 3 times its weight in water for a drier, healthier litter
- ✓ **100% NATURAL ESSENTIAL OILS**
Contains a natural core validated for its disinfectant power
- ✓ **AMMONIA CONTROL**
Significantly reduces ammonia formation in livestock facilities

“ The perfect litter for every species and application ”

LITTER CONDITIONER HIGH DRYING POWER

Properties :

High drying power: Absorbs three times its weight in water.

Its absorption capacity allows it to stay longer on duckboards or gratings. A drier bedding reduces bacterial risks.

Decontamination power

Contains a nucleus from 100% natural origin, validated in vitro and in vivo for its cleansing properties. Allows to fight against risks linked to bacterial development, especially mastitis risks and udder contamination.

The guarantee of softer and dry bedding for longer :

- Decrease of bedding deterioration around drinking places and where birds are used to gather together.
- A better control of beddings temperatures (under 30°C).

Newborn piglets drying :

- Welfare feeling (cover effect)
- Better umbilical cord healing
- Quicker colostrum intake

Absorption test:

DELTASEC mixed at the rate of 2.5 water volumes in 1 volume of product (Immediate result)

Trials results:

Ph Level when the product is saturated with water : Neutral. (Origin of the tests : USA;)

Capacity to purify atmosphere in livestock houses : 1st (Origin of the trials : Brittany - Denmark - U.S.A.).

Capacity to stay on the floor (duckboards) : 1st. Stays the longest. (Origins of the trials : Brittany - Spain - Poland).

Decontamination capacity : 2nd (Origins of the trials : Brittany - USA - Korea).

Absorption capacity : 1er. More than 300 %.

(Origin of the trials : France - USA - Brazil - Spain - Germany - Russia - Korea - China).

Test of the petri-dish at 85 % of relative humidity : 1st.

(Origin of the trials : Thailand - Korea).
Goal : To estimate the capacity of the product to resist to the room humidity. It is twice less sensitive to air humidity than the product in 2nd position. It means Deltasec has a better ability to keep its absorption properties.

Composition:

Ingredients of mineral and plant origin, essential oils and plant extracts.

Contains Eucalyptus globulus essential oil which may cause an allergic reaction.

Directions for use:

Cows on straw : 2kg per dairy cow after clean-up and before mulching.

Stabling : 1kg per dairy cow and per week for 7 sqm of resting area.

Veal crates : 500 to 600g per crate and per week.

Rearing calves : 80g per sqm three times a week.

Turkeys : 40g per sqm twice a week from the 2nd to the 10th week.

Broilers : 40g per sqm twice a week from the 2nd to the 5th week.

Ducks : on straw at the rate of 50g per sqm every day from the 1st to the 12th week and on duckboards at the rate of 30g per sqm every day from the 1st to the 12th week.

Sows : 50g per day behind sows and on exercise area.

Gilts : 70g per day on straw or sawdust litter.

Maternity : Spray on nests or heating plates before parturition.

Sheepfold : 50g per sqm twice a week.

Presentation:

Powder.

Packaging:

25kg bags
